

DISCRIMINAREA COPIILOR DE ETNIE ROMĂ ÎN MEDIUL ȘCOLAR

Cristina OTOVESCU FRĂSIE*

Abstract: This article approaches an up-to-date subject: The discrimination of Roma children in schools. The article shows the Romanian legislation regarding discrimination. It refers to a number of Roma children in schools in Craiova according to the thorough study we have carried out. These children's schooling renders evident the following aspects: most of them skip classes extremely often, some of them leave school, some do not come to school and some are influenced by the migration phenomenon of their parents. By studying different cases we revealed that there are certain schools where we find classes in which only Roma children learn, thus appearing a segregation phenomenon.

Key words: discrimination, education, Roma children, segregation, human rights.
