Abstract

The increases in scope, impact and complexity of international migration has a serious impact – both positive and negative – on the EU and its Member States. In the European Union, establishing the common market and ensuring the free movement of persons within it led to the need of a common immigration policy for non-European citizens, policy whose objectives and means of enforcement constituted and still constitutes the subject of discussions between Member States. Immigration is an opportunity and a challenge for the EU: if properly managed it is “richness” for our societies and economies.

Key words: *immigration, asylum, security, European Union.*
